QATAR

# Our capabilities

## 1/2 the cost

of traditional building construction. Long lasting materials mean little to no maintenance cost.

## 1/20m space

required for storage or shipping. Lightweight components mean simpler, space saving transportation.

# 20+

lifespan created by using our sustainable materials and non corrosive aluminium that creates a long lasting structural solution.

# Leaders in our field

# Areas of use

## INDUSTRIAL AND WAREHOUSE

---

Production buildings, hangars, storage warehouses, airport and cargo terminals

## COMMERCIAL & Offices

---

Stores, sales offices, showrooms, sales halls, kiosks, company branches

## SOCIAL PURPOSE

---

Hospitals, schools and structures for emergency situations

## SPORTS

---

Multi-sports complexes, tennis halls, basketball gyms, wrestling and fitness halls

## EVENTS AND FORUMS

---

Exhibition and presentations pavilions, event tents, checkpoints, temporary infrastructure

Versatile use of technology allows to create objects of any purpose, any complexity and in any region.

# MOST REQUIRED DESIGN TYPES

## THE RODER H-LINE marquee warehouse system – variable and durable

Perfectly meets the space requirements for service and industry: the H-LINE hall system is a storage and logistics solution that provides flexible space that can be adapted to suit any intended use. H-LINE hall systems are ideal for permanent use, but are quick and easy to set up – for installation they just need simple ground or screw anchors, wedge anchors, and spot or strip footings.

Span	10-40 m
Side height	4.2  5.2   6.2   8.2 m
Ridge height	10.17/11.17 for 40 m span
Max wind speed	Up to 100 km/hr.
Side covering	Fabric , trapezoidal sheet and sandwich panel, glass walls
Tarpaulin	PVDF COATED PVC FABRIC

## THE RODER S-TENT – impressive and luxury

Classical architectural solution setting trends in mobile tent and hall construction: the RÖDER Group's Solution classic event hall from the S-TENT series impresses onlookers even at first glance with its cubic shape and large window facades, which allow daylight to pour in and light up the inside of the hall. All of the materials used in the Solution classic meet the toughest of quality requirements, while its modular design allows ample scope for extensions and as much space as you need.

Span	10-30 m
Side height	4  6   10 m
Ridge height	4.48/7.34 m
Max wind speed	Up to 130 km/hr.
Side covering	Fabric, trapezoidal sheet, sandwich panel, plastic, aluminum, glass walls
Tarpaulin	PVDF COATED PVC FABRIC

## THE RODER B-TENT LARGE MARQUEE – classic and roomy

Whether for a successful trade fair exhibition, magnificent evening gala or energy-charged concert, the large tent from the B-TENT series leaves a lasting impression on event organizers and guests alike. This tent hall was designed according to DIN EN 13782 and features impressive tested stability and lots of opportunities for customization. Solid facade elements made of glass, aluminum or PVC can be installed in the large B-TENT as well as extensive lighting, public-address and air-conditioning systems.

Span	40-60 m
Side height	3   4   6   9 m
Ridge height	10.35-17.06 m
Max wind speed	Up to 130 km/hr.
Side covering	Fabric, trapezoidal sheet, sandwich panel, plastic, aluminum, glass walls
Tarpaulin	PVDF COATED PVC FABRIC

## THE RODER B-TENT BODEGA MARQUEE – great space with style

Even a large-scale event benefits from a stylish, elegant ambiance: the B-TENT Bodega large tent combines an extremely large amount of space with a rounded roof that copies a traditional Spanish-style vaulted cellar. With a clear span width of either 15 or 20 meters, the Bodega offers lots of space for evening galas, product presentations and sporting or music events.

Span	3-20 m
Side height	2.29/2.4/3/4 m
Ridge height	2.75/3.40/5.70/6.70 m
Max wind speed	Up to 100 km/hr.
Side covering	Fabric covering, trapezoidal sheet and sandwich panel, glass walls
Tarpaulin	PVDF COATED PVC FABRIC

# Sports halls

# **RÖDER offers individual hall solutions for various sports disciplines as well as specially designed**

Our modular sports halls are the fast installable choice for sporting activities in schools and clubs. Innovative solutions are required for a sports space that meets needs and can be financed. The equipment of the sports halls is precisely adapted to the requirements of the respective sport discipline and individually to the customer.

# Hongqiao Town tennis hall

RÖDER China installed an impressive taylormade designed tennis hall in Hongqiao Town, Shanghai with a span width of 22 m, 36 m length and 9 m eave height. The aluminum glass facade ensures optimum lighting conditions. To fit visually into the surroundings, the aluminium facade profiles were coloured brown, a side wall and the outer wall of the gable wall were extruded with wooden grain square pipes.

# Izmir World Cup

## Rhythm gymnastic halls

For the World Championships in Rhythmic Gymnastics 2014, a large indoor ensemble was needed for training purposes and competition preparations. RÖDER Turkey planned and constructed 2 Polygon halls, each with 18m span width and 55m length, so that the athletes had an area of 1,980m<sup>2</sup> at their disposal.

# Shanghai Sharks basketball hall

RÖDER China installed 2019 a big tent 40 x 49.5m with an eave height of 6m as the training venue for the Shanghai Sharks, one of the teams of the Chinese Basketball Association.

The complete hall is surrounded by fire-resistant colored steel plates, and has two standard basketball courts and an office area. The light yellow color steel plate spray paint echoes the neighbouring Greenland Hotel.

# College Moscow

## Gym hall

The All-Russian State University of Justice needed a new sports hall. RODER OOO installed a 25 x 45m H-Line with a eave height of 6.2m.

The college gym hall is used as the main sports facility of the college for many sporting disciplines: basketball, volleyball, minifootball and boxing. The hall is fully equipped with changing rooms, showers and toilets and also a weightlifter range with exercise equipment.

# Engineered In Germany

MADE BY  
**RÖDER**

“Engineered in Germany” and “Made by RÖDER” are a performance promise to our customers and for us as a premium supplier.

High-quality materials paired with German engineering make our buildings an equally durable but far more cost-effective alternative to a solid structure. In the main, we would like to be your competent partner in every step, from the first concept to the organization of all TÜV approvals and fire protection tests right through to dismantling.

Productions facilities are located in four countries (Germany, Turkey, China, and Russia). We also produce door sets, facade systems made of aluminum, plastic, glass, and ISO pannels, stairs, catwalks, etc. Custom engineered aluminum constructions are also possible. A large structure storage area is located in Doha, which will provide fast logistics to the construction site.

# We are committed to being environmentally friendly and sustainable

The RÖDER Group is certified according to European standards EN ISO 9001:2015 and EN ISO 14001:2015 as well as EMAS, the world's most demanding system for sustainable environmental management. The in-house production control for the execution of steel and aluminium structures is certified according to DIN EN 1090-1.

All of our structures are inspected by TÜV for their design, structural integrity and planning – all statics of RÖDER constructions are calculated and tested according to EN ISO 13782

# EMAS

## Certified Sustainability

The RÖDER Group is committed to a responsible use of resources across all company areas

The environmental management system's eco-management and audit program certifies environmentally-aware working methods, the use of climate-friendly processes, the sustainable use of resources and the willingness to continually improve environmental performance of the future.

The aim of the EU's EMAS scheme is to help organisations and companies to operate in an environmentally and resource-friendly manner without losing their competitiveness.
